Susan,

I don't know what I would add to the ECY status as I don't know what they will be presenting, but I can tell you that progress is being made on the Pasco Site. (good news!)

I am guessing you will hear from ECY that the soil vapor extraction system is going to be expanded and the interim cap is going to be repaired.

I'm hoping we can stay close to the same schedule we currently have in SCAP as I have not heard anything different.

If they have any handouts please get me copy.

Subject: PASCO

Hi Rod,

Lori Cohen and the ECL Remedial Unit Managers are meeting with ECY Managers on Thursday afternoon. One of the agenda items is an update on the status of Pasco Landfill. Do you have anything you would like to contribute to the discussion? It's an informal briefing and I don't know if Chuck Greunenfelder will be present.

Thanks,
